

## OVERVIEW

Angus is a highly experienced international executive management consultant and Enterprise Architect. With more than 32 years of experience engaging with the Board and advising the CxO community on major transformational outcomes, he provides insight to businesses on how to maximise their investment in IT, align corporate and IT strategies and leverage the emerging trends in digital transformation to succeed digitally.

A highly experienced Enterprise Architect he has been involved in all areas and domains of architecture including enterprise, solution, domain, integration, security, business, application, information, information security management and technical. He has worked with a broad range of enterprises – from traditional corporations to purely digital business. His vertical domain expertise covers the Banking and financial services, Defence, large Government, and the Telecommunication sectors.

During his time as a consultant Angus, has developed and built consulting businesses which has given him keen awareness of the issues facing business leaders. He driven architectural efforts on \$300M AUD ERP and CRM initiatives, led the architecture and delivery efforts for projects/programs as large as \$80M AUD, run \$15M AUD P&Ls and led teams of up to 80 staff.

## EXPERIENCE SUMMARY

- Defined the role of EA in a pure digital business including governance, IT strategy development and alignment to the business and IT operating model. Assisted in Cyber Audit and Due Diligence exercise with overseas investors for SWEAT (the organisation and its App).
- Developed a complete enterprise architecture for multiple concurrent shipbuilding programs for Raytheon and the Defence Department spanning over a 30-year period. Designed with Commonwealth governance in mind for a multi-vendor environment. Completed the assignment with a logical design of a secure cloud collaboration environment.
- 2IC for the Architecture and Technology Transformation team (40 staff in all) executing Capgemini's architecture and IT strategy function across Australia with some of its primary customers including the ATO, Lockheed Martin, ServiceFirst NSW, Transport NSW.
- Conducted an organisation wide review of the IT function for Finlaysons to understand and adjust alignment of the capability to the business needs. Advised the partnership and CFO of operating model considerations, cyber and cost implications.
- Led the HealthDirect Architecture team as it delivered digital solutions via AWS and SaaS solutions to the Healthcare information sector for the Australian public. Delivered the Phase 2 architecture for My Aged Care Gateway, advised the Board on the strategic direction of Digital Solutions and ensured the program governance of the Security Infrastructure Program and IRAP review.
- Advised and worked with the Defence Department on a number of high-profile projects including JEDHI, JP2097-Redfin, SEA1000 and JP1544 as a principal EA, strategist, or program director. Worked directly with 2/3 star level command. A number of these initiatives have gone live.
- Led the architectural solution and governance functions for the Federal Government and UBS as they executed the Telstra T3 Float, the single largest share market event in Australia.
