

OVERVIEW

Warren is a Consultant and Architect with over 20 years' experience working within business and IT, both in a permanent and consulting capacity. He has worked at sites across Australia and overseas in a variety of industries including Finance, Utilities, Telecommunications, Manufacturing and Distribution, Pharmaceuticals, Education, Defence, IT Servicing and Government. His experience is wide and varied, more recently as a consultant specialising in Business Intent elicitation, Business Capability Modelling and Transformation Roadmap Design.

Warren has acquired a broad range of business and technical skills in his career giving him an excellent foundation for developing and supporting business requirements. These include Customer Service Management, Sales Management, Business Analysis and Software Development, Infrastructure, Risk and Compliance.

Warren has excellent written and verbal communication skills allowing him to communicate effectively with both a technical and non-technical audience. He has a proven ability of producing high quality written artefacts of a technical or business-oriented nature for consumption at all levels of an organisation.
